

# Isolation & barrier nurse preparation for infectious waste

- STAGE 1** **IDENTIFY** the patient's infectious status using their medical records. If the patient is infectious, proceed to Stage 2
- STAGE 2** **ENSURE** all bags are the correct colour and use Albus Environmental orange bag segregation indicator poster to label relevant storage bins
- STAGE 3** **ISOLATE** the patient
- STAGE 4** **DISPOSE** of all waste generated within the isolation room into the infectious/ orange waste stream waste bag or bin. Ensure that this waste is regularly removed from the setting.
- STAGE 5** **BAG PREPARATION** Please refer to Albus Environmental Bag Preparation for Waste Collection poster for Guidance.
